Experience

Software Engineer II

Nov 2024 – Present

[Mastercard](#) [🔗](#)

Prague, Czechia

- Contributed to the full-stack development of Mastercard's market intelligence solution, SpendingPulse™, to deliver real-time consumer spending insights.
- Owned and delivered core frontend architecture for key deliverables, enabling scalable feature development while maintaining accessibility and code quality.
- Established frontend engineering standards at team level by creating CSS code style standards, modernizing ESLint/Prettier rules, and improving developer experience across the codebase.

Associate Software Engineer

Jun 2023 – Nov 2024

[Make](#) [🔗](#)

Prague, Czechia

- Led the strategy and execution of a public website brand visual reset, taking ownership of styling and new component design to boost user engagement and strengthen brand's online presence.
- Conceptualized and executed a comprehensive component transition and refactor strategy, streamlining development workflows and improving codebase consistency.
- Executed A/B tests and experiments using Growthbook to drive data-informed product enhancements.

Education

Unicorn University

2025 – Present

MSc. Software Engineering and Big Data

Prague, Czechia

A comprehensive Master's degree focused on designing scalable enterprise applications, developing IoT solutions, and applying artificial intelligence alongside advanced statistical analysis in R to process and interpret big data.

University of Birmingham

2020 – 2023

BSc. (Hons) Computer Science — GPA: 3.75/4.0

Birmingham, UK

A project-driven Bachelor's degree combining theoretical foundations in data structures, algorithms, and mathematics with extensive practical software engineering experience across web, mobile, IoT, and machine learning.

Projects

Terren

[terren.grusz.dev](#) [🔗](#)

An open-source, web-based procedural terrain and biome generator that creates and 3D-visualizes voxel maps by combining rules with splines and built-in noise maps, which can be exported as images or 3D models.

Studdy

A full-stack web application designed to assist students in memorizing study materials through the use of flashcards, mnemonic strategies, and gamification mechanics, including a 3D interactive study room.

Skills

Front-end: React, Next.js, TypeScript, JavaScript, HTML, SCSS, CSS, Three.js

Back-end: TypeScript, C#, .NET, Node.js, Express, SQL, GraphQL, MongoDB, PostgreSQL

CI/CD & Cloud: Vercel, Cloudflare, DigitalOcean, CircleCI, Jenkins, Nginx

Testing: Cypress, Storybook, Jest

UI/UX Design: Figma, Canva, Framer Motion, Balsamiq, Blender 3D, Procreate

Additional Languages & Tools: Python, R, Solidity, MATLAB, LaTeX

Spoken Languages: Slovak (Native), Czech (Bilingual), English (Advanced/C1), Russian (Intermediate/B1)
